📏 Tailwind CSS Spacing Utilities

◆ Margin Classes (m-, mt-, mr-, mb-, ml-, mx-, my-)

Tailwind provides utility classes to control the margin of elements. The classes follow the pattern:

- m-{size}: Applies margin on all sides.
- mt-{size}: Applies margin-top.
- mr-{size}: Applies margin-right.
- mb-{size}: Applies margin-bottom.
- ml-{size}: Applies margin-left.
- mx-{size}: Applies margin-left and margin-right.
- my-{size}: Applies margin-top and margin-bottom.

◆ Padding Classes (p-, pt-, pr-, pb-, pl-, px-, py-)

Similarly, padding classes follow the pattern:

- p-{size}: Applies padding on all sides.
- pt-{size}: Applies padding-top.
- pr-{size}: Applies padding-right.
- pb-{size}: Applies padding-bottom.
- pl-{size}: Applies padding-left.
- px-{size}: Applies padding-left and padding-right.
- py-{size}: Applies padding-top and padding-bottom.

◆ Available Size Values

The {size} in the classes above can be one of the following predefined values:

Class Suffix	rem	Pixels
0	0	0px
px	0.0625rem	1px
0.5	0.125rem	2px
1	0.25rem	4px
1.5	0.375rem	6px
2	0.5rem	8px
2.5	0.625rem	10px
3	0.75rem	12px
3.5	0.875rem	14px
4	1rem	16px
5	1.25rem	20px

Class Suffix	rem	Pixels
6	1.5rem	24px
7	1.75rem	28px
8	2rem	32px
9	2.25rem	36px
10	2.5rem	40px
11	2.75rem	44px
12	3rem	48px
14	3.5rem	56px
16	4rem	64px
20	5rem	80px
24	6rem	96px
28	7rem	112px
32	8rem	128px
36	9rem	144px
40	10rem	160px
44	11rem	176px
48	12rem	192px
52	13rem	208px
56	14rem	224px
60	15rem	240px
64	16rem	256px
72	18rem	288px
80	20rem	320px
96	24rem	384px

Note: Each unit increment corresponds to 0.25rem (4px), ensuring consistent and proportional spacing across your designs.

🔄 Negative Margins

To apply negative margins, prefix the class with a minus sign:

- `-m-1`: Applies -0.25rem (-4px) margin on all sides.
- `-mt-2`: Applies -0.5rem (-8px) margin-top.

Note: Negative values are not available for padding.
